

SENTRY SDI

Institutional LED Exit Sign

Introducing the next standard in industrial-grade emergency exit signage – the Sentry SDI. Purpose-built to replace the Sentry CDI, the SDI redefines performance with an ultra-slim 2.5" profile and a virtually unbreakable 1/8" polycarbonate security lens. Engineered for the most demanding conditions, its tamper-resistant design and precision-engineered canopy—adaptable for Top or End mount configurations—ensure uncompromising durability, seamless installation, and a modern aesthetic that speaks to our commitment to protection, reliability, and innovation.

CONSTRUCTION

- Injection-molded internal cavity reflector ensures easy installation and maintenance while delivering perfectly even legend illumination
- Rugged Four-Piece Construction – Engineered with heavy-duty die-cast aluminum and an impact-resistant polycarbonate faceplate, the enclosure features a thick-wall design to ensure long-term structural integrity and resistance to mechanical abuse
- Available in a standard contrast finish of White or Black Frame over a Black, White or Brushed Aluminum architectural finish. See ordering guide for details.
- Ceiling or end wall mounting installations are provided with an oversized canopy that enables more secure mounting with fixing points over a larger surface area.
- Canopy is attached to the sign with two die-cast 3/8" nipples and lock nuts and is suitable for conduit entry
- Also available as a universal field-selectable kit (U), configurable for single or double-face applications
- Single or double-face models can be field-modified to accommodate either configuration, with an additional face, face cover or back, available for separate order

ELECTRICAL

- EM Standard battery backup models are U.L. listed with 120-minute emergency runtime, including support for an optional Razor Remote RZRR3 Exit sign where required. They are equipped with a premium long-life high-temperature fused Nickel Cadmium battery, and feature a diagnostic circuit that monitors the battery condition and indicates via a flashing LED when battery needs replacing
- SD Self-Test, Self-Diagnostic Models are U.L. listed with a 120-minute emergency runtime, and compatible with an optional Razor Remote RZRR3 Exit sign or up to a 3 watt remote lamp fixtures. Equipped with a long-life, high-temperature fused Nickel Metal Hydride battery

- SD Option Compatibility – Supports an optional low-voltage remote matching Razor RZRR3 sign (–REX option, ordered separately). When paired with the –RL option, it also supports one remote PRW1.5 head. Alternatively, with only the –RL option, it supports a 3-watt remote load at 3.6V, compatible with Ray–RH or up to two PRW1.5 remote heads.
- 120 or 277 VAC field-selectable input with quick install whip connector system
- Listed for Wet and Damp locations 10°C to 40°C. The CT cold temperature option allows temperatures down to –40°C (–40°F) to 45°C)
- Power Consumption: AC only Models 3.72W, EM Models 4.1W, SD Models 4.56W, CT Models 7W
- Electronic control circuit applies full wave, low ripple current to each LED, thereby optimizing life and light output
- Circuitry includes – zero current LVCO, brownout sensing and line-latch

ILLUMINATION

- High intensity LED array provides exceptional energy efficiency with just 1-watt power consumption for both single and double face AC models
- Vivid legend illumination approx. 4 times the minimum UL 924 requirement
- Spectrally matched diffuser for superior visual brightness and uniformity

CERTIFICATION

- Tested, Approved, and cUL Listed by Underwriters Laboratories Inc. in compliance with UL924, and Canadian CSA–C22.2 No. 141–15
- Meets or exceeds NFPA 101 Life Safety Code, NFPA 70–NEC and OSHA requirements
- California Energy Commission (CEC) Title 20 Compliant
- NEMA 4X Certified (Available only with the –1B option)
- Buy American Act compliant

WARRANTY

- 5 year limited warranty – view complete warranty terms online at www.evenlite.com/terms-warranty.
